

THIRST AID BAG

BAGS OF WATER FOR EMERGENCY AID

WHAT IS IT?

The Thirst Aid Bag is a personal water purifier capable of quickly turning up to 350 Litres of potentially contaminated water into clear, clean and safe drinking water.

Designed with emergency use in mind, the bag will fold up small for compact storage and easy transportation, meaning it's a very cost effective solution to getting clean water where it's needed.

Our disinfection media is based on Electrodeposition and that removes even the smallest viruses, as shown by independent testing.

Made from our extremely durable Armour Weave material and built to the strictest quality control procedures, the Thirst Aid Bag is designed to provide you with purified water again and again whatever the conditions.

Dirty water in, clean water out, it's that simple to use.

WHY THE THIRST AID BAG?

The Thirst Aid Bag uses our world renowned Aquapure Traveller Filter - the **only** filter fully endorsed by the Hospital of Tropical Diseases London.

We are an official partner of the Foreign & Commonwealth Office's 'Know before you go' campaign and our technology is approved for use by the UK MOD.

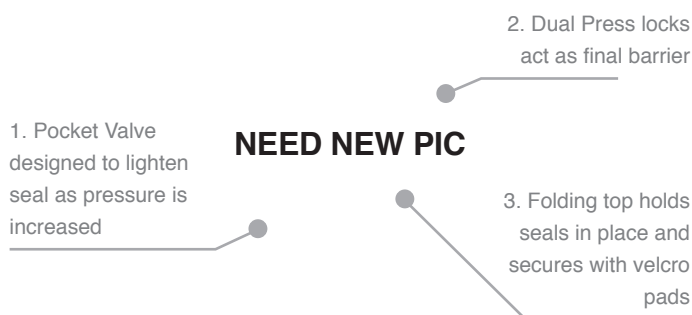

WHAT DOES IT REMOVE?

- ✓ Viruses & Bacteria
- ✓ Pathogens (including Cryptosporidium & Giardia)
- ✓ Bad tastes & odours
- ✓ Chemicals (including VOCs, SOCs)
- ✓ Heavy metals
